Bilateral Meetings

- Wednesday 10:40 h - 13:00 h

Description

Farmácia Saúde is a Pharmacy that provides healthcare to thousands of patients every year and felt the need to increase the effectiveness of their actions in an even closer follow-up, simultaneously increasing the feedback from their interventions. We also shared the feedback with the health professionals who accompany the patients, which allows a readjustment and optimization of the therapeutic options for the patient and generic studies about effectiveness for the rest of the population. We are also partners in phase IV trials, with some pharmaceutical companies in generics and innovative medicines, and is our intention to partner with institutions and companies in the development of successful translational health projects.
